# CONSTRUCTION UPDATE

September 21, 2018

## Kentfield Pump Station 15 Improvements Project

**This update for September 21 is to address noise concerns from equipment being used for wastewater bypass pumping as improvements take place at the Kentfield Pump Station. This capital improvement project is designed to replace outdated system infrastructure and enhance system reliability.**

The noise is being caused by irregular material entering the sewer system and clogging the bypass pumps, causing them to work harder than normal and generate extra noise.

We are taking the following steps to correct this problem as quickly as possible:

- The contractor has been cleaning and maintaining the equipment at regular intervals and will continue to do so.
- RVSD staff have installed a screen at an upstream manhole to reduce the amount of material reaching the pumps.
- RVSD and the contractor will continue monitoring the situation until noise from the bypass pumps remains at acceptable levels.
- The project team has enhanced our operating strategy for the Kentfield Pump Station. Over the weekend of September 22 – 23, RVSD staff will be on-site from 8:00 p.m. – 8:00 a.m. to monitor overnight issues and to prevent further noise disturbances in the neighborhood.
- **Please call 415-259-2949 during the above times for an immediate response.**

RVSD office staff are available Monday through Friday from 7:30 a.m. to 4 p.m. We can assist you with emergency service 24 hours a day, seven days a week. Our business office and emergency number is 415-259-2949.

### For More Information
